

To the FCC:

I support XM Radio and its traffic and weather channels. Please reject NAB's petition 04-160. If Radio Broadcasters are worried by competition from satellite radio, maybe they should concentrate on producing a better product rather than using the political process to stifle their competitors.

Please support consumer choice -- the ability of the consumer to choose XM Radio and its traffic and weather channels.

Thank you.

Yours,  
Willis Sautter  
Washington, D.C.
